The Complete EHR Solution

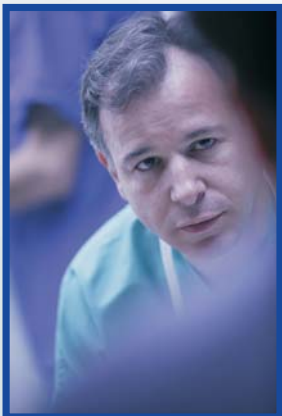

“WHY YOUR OFFICE MUST HAVE ELECTRONIC MEDICAL RECORDS”

THE FUTURE IS HERE NOW.....

President George W. Bush issued an Executive Order on April 27, 2004 which calls for virtually every American, to have an Electronic Health Record within 10 years.

The Facts

- Medi-EMR Integrates, Communicates and Exchanges Data with virtually any other database in the medical or commercial community.
- With Medi-EMR , you can create an Electronic Superbill, that documents diagnoses and the services rendered during a patient encounter for review by administrative personnel. Medi-EMR Automatically Updates CPT and ICD-9 Codes.
- Within the scheduling component is a unique Performance Tracking System, allowing you to monitor Multiple Offices and Every Exam Room within your facilities, in a Real Time Format. This gives you the capability to Track the Workflow and the Point of Treatment within your practice, complete with time-stamping, user-stamping and reporting
- Medi-EMR 's Scheduling Component is top notch allowing each user to customize screens according to their preferences.
- We can use your existing demographic database to Populate your EMR system, eliminating the need to re-enter your patient information.
