The Complete EHR Solution

What makes Medi-EMR Unique?

- ▶ Medi-EMR runs on a robust Oracle database, only 10-15% of EMR systems run on such a superior proven enterprise database.
- ▶ Fifteen years of consulting experience performing high end commercial integration for Fortune 100 companies enables Medi-EMR to interface with virtually any hardware or software solution used in today's healthcare industry.
- ▶ Medi-EMR's rapid deployment tools allow Medi-EMR to customized and implement our system in about 1/10 the time of our competitors
- ▶ Medi-EMR is ergonomically designed to present an elegant, clean, uncluttered screen. This facilitates rapid training and ease of use.
- ▶ Medi-EMR is an ASP model (Application Service Provider). Only 15% of the competition offers such a model. An ASP model is rapidly becoming industry standard
- ▶ Our zero start-up cost business model, allows practices to acquire a complete EMR system for a low per month per physician subscription.
- ▶ Medi-EMR has no modules; the client purchases a complete EMR solution for one price. Our competitors offer as many as twenty-five modules to "nickel and dime" the client.
- ▶ Medi-EMR has no hidden costs such as transaction fees, maintenance, upgrades, etc.
- ▶ Medi-EMR allows the physician to access records from virtually anywhere in the world, eliminating the need for special networks, hardware or proprietary software to be loaded on the computer.
